**SGH Equipment**  
MATERIALS HANDLING SOLUTIONS

## New Office, New Additional Staff, New Accreditation = Happy New Year

SGH Equipment Limited is pleased to announce their acquisition of larger premises which were conveniently located in the same building as the previous office! One up for our carbon footprint, no removal costs, no change in stationery and above all the same telephone number **01270 619721**.

The move combined with an increase in staff all goes towards providing better service for our clients:

New staff members are:

**Alick Satterthwaite** Engineering Manager. Alick manages our Installation Maintenance Contracts.

**Chrissie Crossan** joins our Administrative and Sales staff.

**Stephen Beales** joins SGH as Technical Manager, specializing in pneumatic conveying/process engineering.

*See Full SGH Team details at end of newsletter.*

SGH Equipment has spent the last three months working towards their **ISO 9001 Accreditation** and we estimate we should have the accreditation in full by Spring 2013

This can only enhance our processes and systems which ultimately will allow us to provide a more efficient service for all our clients.

## New Partners

SGH are pleased to announce new business partners who have come on board during 2012. We are currently marketing and promoting these services, should you require any information on these products please do not hesitate to contact us:

**MANGRA, S.A.** is an engineering company with a wealth of experience in **agribusiness (feed-mills) and agrifood installations**.

They are specialists in application technology, machinery and installations for the animal feeding industry and are leaders in the area of **liquid addition and process controls for feed-mills**.

For over 25 years they have been creating a range of equipment and automatic controls in order to facilitate the usage of the wide range of essential liquids used in all formulations or recipes for the production of compound feed.

**Applied Plasma Physics.** (Sandes, Norway) are innovators and providers of **world class Odour and Dust abatement systems**.

Recommended as Best Available Technique by IPPC/EPA. They are particularly suitable for **pet-food, fish feed and food industries**. The non-thermal plasma systems are **very low maintenance and operating costs with efficiencies of 80 – 99%**. They produce no waste or by products and need no consumables.

CETEC Bagging Sealer

**Farleygreene.** We are pleased to be appointed the North of England representative of a leading British manufacturing company with over 40 years experience of providing excellence in the manufacture and supply of **sieves, sifters and screeners** for the food, pharmaceutical and chemical industries. Farleygreene also offers a full validation package for their machines including design, installation and operating qualifications.

*In addition to the above our full partnerships include:*

- **CETEC Industrie -**  
*Open Mouth Bag Solutions, Weigh, Bagging, Closing, Collate and Palletise.*
- **GOODTECH-Portabulk**  
*Fertiliser Bagging Solutions, High Speed FIBC/Big Bag Filling.*

Lump Breaker

**Twin Silo, weigh out & pneumatic conveying system - SCADA Control**

### SGH Services

- *Design*
- *Manufacturing*
- *Fabrication*
- *Mechanical & Electrical*
- *Installation*
- *Relocation*
- *Refurbish*
- *Commissioning*
- *Automations – software and control for plant and process optimization*

## Materials Handling Solutions

**SGH Equipment Limited** has many years of experience providing equipment and process solutions for the safe handling of all types of materials. Established in 2004 and currently operating from our Nantwich office. **Specialising in bulk handling of powder and granular materials** we can design, supply and install systems to meet the increasing and challenging demands of modern industry.

We can also **offer solutions** for both **liquids and gases** for your flow and pressure control requirements.

Utilising strong supply partners with the resources and capabilities of local and multi-national manufacturing we can offer advice and assistance to provide material handling solutions that are **both cost effect and performance guaranteed.**

Providing a comprehensive range of equipment that is directly sources from some of the world's leading manufacturers

Equipment provided:

- Storage Silos and vessels
- Silo Safety Systems
- Discharge & Flow Aids
- Valves and actuators
- Conveyors and feeders Mixer and blenders
- FIBC /Big bag (fill & discharge)
- Weighing & packing Manual Lifting Solutions
- Liquid Dosing
- Odour Abatement
- Industrial Sieves
- Specialised equipment
- Used Equipment

### APPLICATIONS

SGH Equipment Limited has accumulated a wealth of knowledge regarding different equipment coupled with experience of applications involved in a variety of industry sectors that span areas such as:

- MINERALS
- CHEMICALS
- FEEDS, PET FOOD AND CEREALS
- FOODS
- WASTE WATER TREATMENT
- FINE CHEMICALS
- PHARMACEUTICALS

Please call one of the team to discuss your business needs.
